## VINYL ACETATE ADHESIVE

### BW-211

#### Technical Data

**Product Description** This kind of adhesive is produced based on vinyl acetate homopolymer emulsion.

**Features**

- Contains no fillers.

#### Typical Properties

Appearance	Milky White emulsion
Solid Content (%)	26±1
Brookfield Viscosity @25°C (cp)	25000-30000
PH	5-6
MFFT(°C)	5

**Application** This product is used in MDF industries and duplications.

**Product Handling, Storage and Shelf Life** To ensure safe storage of this emulsion, containers should be well sealed to prevent water evaporation and skin forming. The product must be stored between 5-25°C for maximum 12 months.  
Freezing and direct sun light must be avoided.
